**Cherry Parker : How I Published My First E-Book: with tips and tricks from a successful e-book author** before purchasing it in order to gauge whether or not it would be worth my time, and all praised How I Published My First E-Book: with tips and tricks from a successful e-book author:

If you can put words into a Word document you can publish an e-book. If you can describe something in a simple to understand way you will be able to write words in exactly the same manner. If you can provide the answer to a much Googled question you will have a successful e-book. If you can write in easy to read, bite sized sections with lots of headings and a lot of emphasis you have an e-book. If you can quickly and easily provide understandable information you will have an e-book. E-books don't have to be long never ending volumes of work. Tutorials, quick reads and 'How to' options are extremely popular. Fewer words and punchy pages equal a good e-book. Write what you know. Experience tops qualification. Simply explain your passion. Truthful emotion sells e-books. This e-book is entirely based on my own experiences learnt from producing my own successful e-books: Living with an Alcoholic Husband, How Can I Help my Alcoholic Husband? and To My Darling Wife. The demand for this e-book follows the popularity of several successful workshops I have presented on the subject.
